

AMRESH KUMAR MAHATO

PYTHON DEVELOPER

Bangalore, India

| +91-9916835715

| amreshkrmahato123@gmail.com

PROFILE SUMMARY

Experienced **Python Django Developer** with **3.4+ years** of experience building scalable enterprise applications using **Python, Django, Django REST Framework (DRF), REST APIs, Microservices, PostgreSQL, MySQL, Kafka, and AWS**. Skilled in backend engineering, **API integration, distributed systems, CI/CD workflows, cloud-based solutions, and scalable web applications**. Strong expertise in **database optimization, authentication systems, asynchronous processing, and Agile software development**.

EXPERIENCE

Ascendion Engineering Ltd

Project: Hp-Agena Gemini | Generative AI | Modernization

Software Engineer | 2025 – Present

- Developed AI-based multi-agent workflows integrating Jira, GitHub, and Confluence platforms using Python.
- Built Django-based backend services and REST APIs for AI workflow automation.
- Developed Python tools for Jira Story Reader and GitHub File Reader automation workflows.
- Automated LLD generation, validation, and document upload processes using AI agents and Python scripting.
- Built scalable backend APIs using Django REST Framework (DRF).
- Implemented authentication and authorization using JWT-based security.
- Integrated React.js frontend with Django backend reducing manual workflow effort by 40%.
- Developed distributed backend services and API integrations for enterprise workflows.
- Improved unit test coverage and reliability using PyTest and UnitTest.
- Worked in Agile and CI/CD environments to deliver scalable backend solutions.

Onward Technology Ltd

Project: FinishLine

Software Developer | 2024 – 2025

- Developed Product Service modules using Django and Django REST Framework for managing product catalogs.
- Built Order Management APIs for order processing and transaction workflows.
- Implemented Inventory Management modules for stock tracking and product variants.
- Developed scalable backend applications using Python and Django architecture.
- Designed secure authentication and authorization using JWT authentication.
- Implemented asynchronous task processing using Celery and Redis.
- Improved API response efficiency by 35% through backend optimization and query tuning.
- Integrated PostgreSQL and MongoDB databases for scalable storage solutions.
- Conducted API testing using Postman and PyTest.
- Collaborated with Agile teams to deliver scalable ecommerce backend solutions.

Zensar Technology

Project: FinsihLine

Software Engineer | 2022 – 2024

- Developed scalable backend modules for Owners, Buyers, Tenants, and Sellers using Django.
- Designed and implemented database schema using PostgreSQL, MySQL, and Django ORM.
- Developed RESTful APIs using Django REST Framework following MVC architecture principles.
- Integrated third-party APIs for SMS, Email notifications, and automated report generation.
- Configured secure payment gateway integration workflows.
- Implemented JWT authentication and role-based authorization for secure API access.
- Developed Ratings, Reviews, and Comments features to improve customer engagement.
- Built scalable microservices and backend APIs using Django and Flask.
- Implemented asynchronous communication and task scheduling using Celery and Kafka.
- Optimized backend services for scalability and maintainability.

SKILLS

- Programming Languages: **Python, SQL, JavaScript, Java**
- Frameworks & Libraries: **Django, Django REST Framework (DRF), Flask, ReactJS, Springboot**
- Backend Development: **RESTful APIs, Backend Engineering, API Development, Microservices, Distributed Systems, Scalable Web Applications, Enterprise Applications**
- Databases: **PostgreSQL, MySQL, MongoDB**
- Asynchronous & Messaging Tools: **Celery, Redis, Apache Kafka**
- Cloud & DevOps: **AWS (EC2, RDS, S3), Docker, Nginx, Gunicorn, CI/CD**
- Authentication & Security: **JWT Authentication, OAuth2, Role-Based Access Control (RBAC)**
- Testing & API Tools: **PyTest, UnitTest, Postman**
- Version Control & Collaboration: **Git, GitHub, GitLab, Jira, Agile Scrum, Kanban**
- Frontend Technologies: **HTML5, CSS3, JavaScript, ReactJS**
- Development Tools: **VS Code, PyCharm**
- Software Engineering Concepts: **MVC Architecture, ORM, API Integration, Database Optimization, Multithreading, Scalable Architecture, Performance Optimization**
- Generative AI & Automation: **AI Agents, Prompt Engineering, Workflow Automation, ChatGPT, AI Integrations**

EDUCATIONS

Bachelor of Technology in Computer Science & Engineering	2017 – 2021
Madanapalle Institute of Technology and Science (JNTUA)	
<i>Kadiri Road, Angallu, Madanapalle - 517326</i>	

ACHIEVEMENTS

- Awarded **Best Employee of the Year 2023** for **outstanding performance** and contribution to project delivery.
- Improved **REST API performance by 35%** through backend optimization and efficient database query tuning.
- Developed scalable and secure backend applications using **Python, Django, and Django REST Framework (DRF)**.
- Implemented **JWT-based authentication and authorization** to enhance application security.
- Built and optimized **RESTful APIs, microservices, and distributed systems** for enterprise applications.
- Integrated **third-party services including payment gateways, email notifications, and cloud services**.
- Worked in **Agile Scrum and CI/CD** environments to deliver high-quality software solutions.
- Improved application reliability through **unit testing, API testing**, and backend validation using PyTest and Postman.

ADDITIONAL INFORMATION

- **Languages Known:** English, Hindi
- **Notice Period:** Immediate Joiner
- **Open to Relocation:** Yes
- **Work Authorization:** Eligible to work in India
- **Portfolio:** <https://amreshkrmahato.github.io/amreshkumar/#portfolio>
- **LinkedIn:** <https://www.linkedin.com/in/amresh-mahato-4a4955166/>
